

Remote Patient Monitoring (RPM)

Benefits to Patient

- ✓ Your **Blood Sugar Data** will be reviewed on a **monthly** basis by your Diabetes Care Team
- ✓ Will identify **High Blood Sugar** trends and recommend any corrective action via the Patient Portal
- ✓ Will identify **Low Blood Sugar** trends (hypoglycemia) and recommend corrective action via the Patient Portal
- ✓ Will ensure that all scripts, forms, Prior Authorizations, and office notes are up to date with your DME or Pharmacy provider so that there is no lapse in your supplies or medications
- ✓ Identify if a sooner appointment is required for a **MAJOR** adjustment in treatment plan
- ✓ These steps will make sure your diabetes treatment plan is **EFFECTIVE** in between your face-to-face office visit with your provider
- ✓ These steps will ensure you are receiving the **highest quality care** which is our main mission objective at Diabetes and Metabolism Specialists (DMS).
